PVC BACKED COIR

PVC Backed Coir is an eco-friendly entrance matting solution for medium traffic areas, designed for indoor entrances. Ideally used as a recessed mat, this product can also be edged with heavy duty edging for loose laid applications.

Available in natural coir colouring in four thicknesses (13mm, 17mm, 24mm or 30mm) or in dyed black or grey (17mm only).

FEATURES

- Indoor or covered outdoor mat for high traffic entrances
- Coarse coir bristles provide excellent scraping to the base of footwear
- PVC backing reduces the dislodging of coir fibres
- Made from ethically sourced coconut fibres
- Available natural or as dyed black or grey

Note: As coir is a natural product it will be affected by moisture. Excessive moisture will cause coir to swell and is not covered under warranty.
