

Tactiles

Tacalert Tactile Indicators are used to warn vision impaired pedestrians of hazards and also to give directional guidance. They are used in public places such as commercial buildings, shopping centres and railway platforms at escalators, pathways, ramps and stairways

FEATURES

- Manufactured to meet Australian Standards AS/NZS 1428.4
- Available in Brass, PVC or Stainless Steel
- Can be installed on most surfaces including carpet options
- Bevelled edges for safe transition
