(Type B)

TOUGH TREAD

Tough Tread is a hardy, absorbent and non slip floor covering that is very long lasting in demanding areas. Made from hard wearing polypropylene, this material will withstand the most intense foot traffic and stand up to light wheeled traffic such as trolleys. The low profile yet ultra-dense construction prevents pile flattening so the appearance always remains the same. Tough Tread does not pill so is easy to keep clean and maintain.

FEATURES

- Attractive level surface is easy to keep clean and maintain
- Absorbent fibres trap moisture to prevent slips and falls on your floor
- Unique non crush pile construction ensures long life in the most demanding applications
- High slip rating making this flooring a preferred choice in public spaces
- Provides a high level of sound acoustics
- Ideal for high foot traffic applications
- Designed to be fixed to the subfloor either in a recess or with a transition trim around the perimeter
