## PROTECT-A-MAT

Protect-a-Mat is designed to help protect entry mats when bringing heavy equipment including scissor lifts, cars and even forklifts through the building over the entry matting.

### FEATURES

- Prevents tearing, stretching and buckling damage to entry matting.
- The mats are designed to take up to 60 tonne per mat.
- Designed to be lightweight for easy placement to protect matting.
- Low profile to allow for easy scissor access.
- Available with a trolley for easy storage and portability. Includes non-marking wheels.
