# AIR GRID FIRE RESISTANT

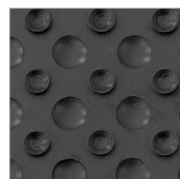

Air Grid is a fire resistant hardwearing, comfortable, non-slip anti-fatigue mat. It is used in demanding work areas to provide comfort under foot. Because of its fire resistant properties, this mat is often installed in high risk areas such as mines, oil rigs and workshops.

## FEATURES

- Unique cushioning design provides a high level of comfort underfoot.
- Made with a fire retardant compound to self-extinguish.
- Leather grain pattern on surface eliminates trips and slips on mat.
- Ramped edges minimise the potential for trip hazards.
- Suction cups on underside assist in steady floor adhesion.
